ISO 17025
No. 0773

Torus Growth

Torus Measurement Systems

Torus Measurement Systems are used extensively within industry for dimensional and destructive testing under production conditions to create inspection equipment that meets the quality demands of your customers. Ranging from measurement machines and inspection machines, through to manual fixturing to full automated and integrated turnkey solutions, Torus' project team will work to develop the equipment to best suit your requirements utilising the latest contact and non-contact technology.

Measurement Equipment

The continual advance of technology in the uncompromising world of precision engineering, means that precise measurement throughout every process is paramount to each successful outcome. Torus Measurement Systems keep abreast of such technologies and provide a level of commitment, skills and service equally without compromise.

Torus Measurement Systems offers a complete inspection solution to almost any measurement problem. Our UKAS approved laboratory provides a comprehensive range of calibration, sub contract inspection equipment services, programming and measuring equipment. Our engineering team will design, manufacture, build, test and support both standard 'off the shelf' inspection machines and measurement machines, plus special purpose measuring equipment.

Our commitment to quality and superior levels of service and support is paramount and is backed by our ISO 9001 quality management system, which is rigorously enforced to promote continuous improvement.

- Medical Gauging

Bespoke Gauging

Software

- Statistical Process Control (SPC) Data Acquisition
- GaugeXplorer Software
- RemoteXplorer Software

Torus Manufacturing

Torus Manufacturing provides outsourced manufacturing services that include machining, assembly and fabrication, as well as our own on-site manufacturing design, 3D printing and inspection services.

We offer a number of shipping and freight services. Our group logistics department will oversee shipping from start to finish and are fully conversant with import and export processes. When creating a quotation we will work with you to determine which shipping method suits your needs and provide a competitive shipping quote accordingly.

With our passionate and dedicated team based in Telford, UK, whether you require a turnkey solution, batch manufacture, or 1-off manufacturing requirement, you can be assured that Torus Manufacturing can provide the answer to your needs.

Our dedicated team in the UK have the expertise and knowledge to ensure:

**ON TIME
DELIVERY**

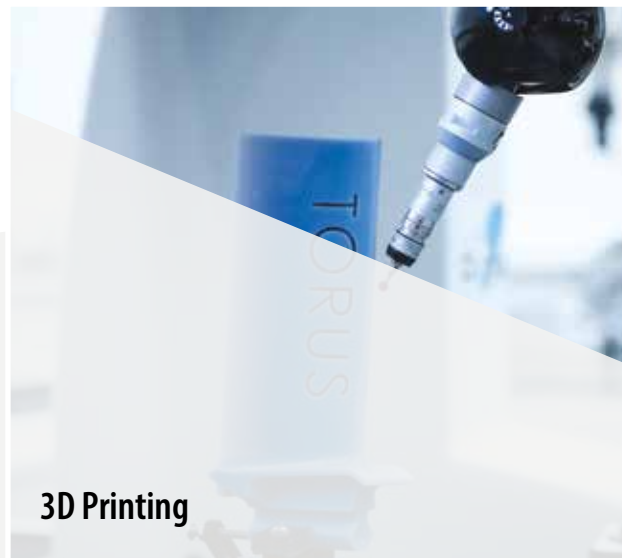

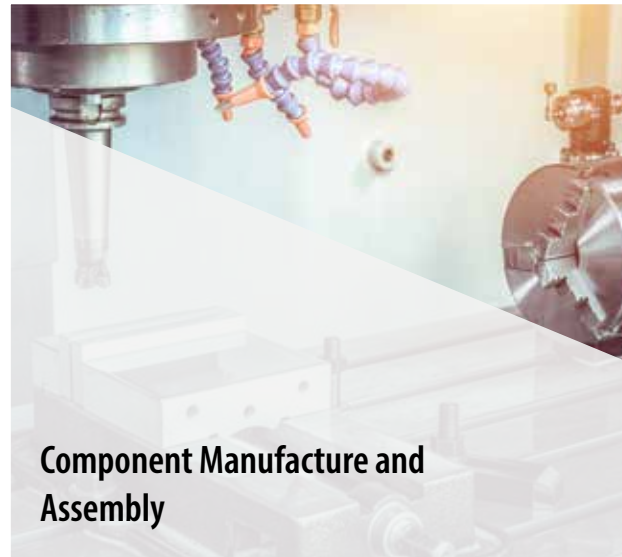

**ON POINT
QUALITY**

**ON BUDGET
COSTS**

Whatever the size of your company or your manufacturing requirements, Torus Manufacturing can provide a solution.

Our services

Torus Metrology

We are here to help with all your inspection needs, whether you struggle with inspection capacity, or need extra capability, we can meet your requirements and alleviate the pressure.

Having many years of experience producing measurement equipment and using Optical inspection services, our engineers design and build ergonomic and practical solutions to meet your needs.

Our Accreditations

Torus Metrology has a UKAS (United Kingdom Accreditation Service) Calibration Laboratory which conforms to the requirements of ISO 17025. This ensures that we are competent to deliver confidence in our activities which are conducted in a reliable, credible and accurate manner.

Modular Frameworks

Modular Frameworks offers a range of flexible, high quality, robust aluminium profile solutions for industrial environments including office, production, manufacturing and factory facilities.

Our range includes (but is not limited to) **metrology workbenches, workstations, enclosures, controlled environments, partitioning** and **protective screens**. The solutions are all designed, machined, managed and built in-house at our factory in Telford, Shropshire.

Totally Bespoke

We understand that one size does not always fit all, therefore all of our products are designed and built to suit our customers needs providing a completely bespoke solution.

Totally Configurable

Each product has a number of options and configurations that customers can choose from to meet their own unique requirements. Need a temperature controlled machine enclosure with air conditioning? Need removable access panels? Would much prefer bi-fold doors to standard opening doors? All of these options and more are available.

DEDICATED REMOTE SUPPORT
ENGINEERS

Global Support Process

At Torus Measurement Systems we believe our job isn't finished until you can do your job better. We do that by supplying the highest quality products possible and backing them up with service and support dedicated to meeting your needs.

- > Dedicated Technical Support
- > Global Customer Service
- > Maintenance Contracts

- > Breakdown Cover and Spares
- > Verification and Re-Calibration Services
- > Engineers Located Worldwide

Torus offers a comprehensive customer service facility from a dedicated technical support and administration team based at our Telford, UK office. We also have a number of global customer service partners based at strategic locations.

Our engineer and partner companies travel globally providing installation and training services worldwide.

Login Remotely

If the problem can not be resolved over the phone, we can access your machine remotely to do more in depth diagnostic checks.

Engineer will be Sent

Failing both means to resolve your issue, an engineer will be sent out to fix your machine.

Happy Customer

Customers can relax and feel assured they are in the right hands.

Finish
