Investing in our  
Facilities for a  
*Better* Future:  
**Our Cleanroom**

## Investing in our Business

Dudley Associates are well known for our dedication to consistently looking to improve and build on the quality, facilities and products provided to our customers.

We ensure that each product is created to the exact specifications required, taking into the account industry specific needs and expectations.

Which is why we are always looking to invest in ways to improve and expand our manufacturing facilities to accommodate our customer's needs.

---

The investment of our Class 8 Cleanroom ticks these boxes nicely for many industries, including electronic, household, food and medical.

The contamination free environment means that we are able to produce parts of exceptional quality whilst maintaining certain standards needed.

## Customer Confidence

Our Production Manager, Paul Magee, told us,

“Having the cleanroom gives us, and more importantly, the customer, the confidence and peace of mind that the products we manufacture are fit for purpose, of the highest quality and contamination free.”

***Find out what we are capable of and have a discussion with our experts on how we can assist with your next project.***
