

Why companies are reshoring at Avalon Plastics

Avalon Plastics has been supporting customers for many years, with reshoring tooling and injection moulding supply, to benefit from a more responsive and reliable UK supply chain. Increasing numbers of companies are frustrated by long lead times and unreliable overseas supply chains. With proven reshoring experience, Avalon Plastics is well placed to assist the increased numbers of customers which recognise the overall benefits of transferring tooling and manufacture back to the UK.

Whether it is a technology transfer or re-tooling, Avalon will fully project manage your reshoring requirements.

- We have established global Logistics partners to ship your tooling to Avalon plastics.
- If you need to re-tool, not only can we manufacture and sample new tooling in house, our toolroom can design from scratch or reverse engineer tooling from your components.
- Our Glastonbury facility is a 24/7 operation with 40 injection moulding machines from 35t to 1100t – so, if you need a quick turn around on orders or are looking for someone to cope with high demand, we have the solution.
- Avalon are ISO 9001:20015 certified and have the capabilities in house to both measure and test your product to your specific customer requirements.

**"We aim to be the strongest link in your supply chain for injection moulding and tooling solutions."
Richard Winterbottom – Managing Director**
