

Tebis UK Announce Partnership with 3Dconnexion

Tebis UK recently unveiled an exciting collaboration with 3Dconnexion to make the best possible use of their CAD/CAM/MES software. Tebis offers manufacturing solutions for die, mould and model manufacturing, mechanical engineering, and precision machining with over 40 years' experience. Tebis solutions support 2.5D to 5 axis milling, turnmill, trimming, laser cutting, robotic machining as well as industrial design and reverse engineering.

3Dconnexion designs powerful, research-based ergonomic hardware, from the SpaceMouse 3D mice, CadMouse, to the Keyboard and Numpad and other 3Dconnexion products. Together, with Tebis and 3Dconnexion, CAD/CAM users can expect time and cost saving, better performance, smooth graphical manipulation and animation.

The Tebis training facility has now been fully equipped with both SpaceMouse and CadMouse, ensuring the best user experience. This partnership is more than just to offer a better training experience to Tebis' users but, it aims to improve the way engineers work.

Ryan Waters, Junior Application Engineer from Tebis UK explains, "The 3Dconnexion SpaceMouse has changed how we work. Navigating parts feels natural, and the workflow is a lot smoother. Plus, being able to customise the controls makes it super personal and efficient for our team."

Tebis' advanced manufacturing solutions serve companies in the automotive, aerospace and mechanical engineering sectors, as well as in industrial design. Whether, your business is involved in the development, design and manufacturing of models, moulds, dies or mechanical components, Tebis can help you to utilise the full potential of all the modern high-performance machines.
