

## Tri-Tech 3D join the fight against COVID-19 with state of the art 3D Printing technology

Tri-Tech 3D & sister company 3D Print Bureau Ltd is joining the worldwide Stratasy community on the fight against COVID 19. Our Stratasy Fortus 450's have been working non-stop over the weekend to produce protective visors for our NHS frontline workers. Are you an FDM user and want to get involved?

These particular visors have been tried and tested on the wards of the Queen Elizabeth Hospital in Birmingham and a local GP surgery to our offices in Stoke-on-Trent.

**Message us** for the files & help join the worldwide efforts to protect our workers against this life-changing pandemic we are facing.
