

Gore Road Industrial Estate Gore Road, New Milton Hampshire, BH25 6SA T: +44 (0) 1425 613131 hello@becgroup.com www.becgroup.com

Our Service

End to end design, <u>product</u> <u>engineering</u>, tooling and moulding. Injection mould tool design and manufacture, tooling modifications, plastic injection moulding, 2nd ops and product assembly.

The Project

Hatpac

Our Client

<u>Pacfinity</u>, based in the UK, is the creator of the PAC[™] brand. Launched in 2019, with an innovative storage solution for baseball caps.

Our Mission

Pacfinity's founder, Jack, identified and visited a number of plastic injection moulding companies but didn't get the help and support he was looking for. Our mission was to reassure him that UK manufacturing with BEC was a viable option.

Read the full project overview.

<u>Contact us</u> for help with your next plastic injection moulding project.

Our Customer's Feedback

"The extent of <u>BEC's knowledge and expertise</u> of plastic injection tooling and moulding was obvious from the outset. They restored my confidence in UK manufacturing, and I knew that if these guys couldn't make the Hatpac then no-one could. Based in Hampshire it was so easy for me to visit the team and be onsite to sign off at each critical phase of the design, tooling and moulding process. As an inventor they helped me navigate the manufacturing process and the steps to making a plastic injection moulded product. They were always willing to answer any questions, talk through my concerns and any challenges were faced head on, with solutions always found." Jack Hamilton, CEO and founder of Pacfinity

Our Solution

We worked closely with Jack throughout a complex product development and manufacturing process to keep him informed at every critical stage.

With in-house design, tooling and <u>moulding</u> capabilities under one roof, it was easy for Jack to be involved from start to finish.

The Result

Successful Hatpac product launch available in time for Christmas 2019, with a very exciting, high profile celebrity endorsement on Instagram.

Making your plastics better
