

CyTab clamping systems STP units *Solutions for body construction*

CyTec have over 35 years of experience developing and supplying the automotive industry with our CyTab clamping systems.
The STP units are used extensively by vehicle manufacturers in their body assembly lines.

- Used in modern production systems that require a modular-systems;
- Fast set up and quick tool changes;
- Self-locking in clamped position;
- Can be used in a wide range of applications (*Transfer, Framing, Gripper Bars and Swivel Bridges*).
