

CyTec Germany has a wealth of experience producing and developing automation for injection moulding machines for the European market. We are pleased to announce that we are now able offer robots to customers in UK and Ireland.

CyTec Automation and Handling can offer motion picker and motion liner with KEY 2 motion intelligent control system.

Key benefits

- Safety systems on all motion pickers and motion liners;
- 8.4-inch touch screen for safe handling;
- Self-explanatory graphic keys make programming easy and clear.
