

Autosport International 2016

We were revving to go and exhibit at the Autosport International 2016 Trade show at the NEC on January 14th and 15th.

As a company full of automotive enthusiasts it is fair to say we were a little excited at being at the show. And our excitement wasn't in vain!

During the show we were in touching distance of amazing vehicles and this only enhanced our enthusiasm for working with them for 3D scanning and 3D Printing related projects.

Over the two trade days we had a great selection of visitors to our stand interested in our products and services for personal and business related automotive projects. Together with our visitors we discussed some really interesting past, present and future projects and look forward to what our services can bring to this industry in the future.

If you missed us at the show, take a look at our upcoming events and be sure to visit!

Race Retro 2016 – 26th to 28th February at Stoneleigh Park, Coventry – Hall 2

Develop3D Live 2016 – 31st March at the Warwick Arts Centre – Stand 38
