New Investment at Moorlands

Announcing the commissioning of our latest piece of equipment. The state of the art Hurco BX50i High Speed Machining Centre further enhances our manufacturing capabilities.

The double column (bridge type) design provides extreme spindle rigidity and support. Fitted with the new MAX5 control we can really take advantage of faster rapids and higher spindle speeds giving higher accuracy, better surface finish and faster turnaround for our customers.

1350 x 950 x 600mm xyz axis capacity.      1500 x 960 table working surface.

18,000RPM Spindle speed.                      30 station auto tool change.

We are working hard to support our customers, particularly in these extremely trying times, this new investment shows our commitment to improving our manufacturing techniques.

The machine is already being put through its paces - **Help us put it to the test !**
