- **Covers unsightly floors economically and cost efficiently**

P&R Tile is a new interlocking flexible PVC flooring tile available in numerous colours. It is so quick and easy to install and pound for pound the most economical of floor coverings on the market. It will literally transform the look of your factory, car showroom, engineering shop, warehouse, automotive garage, domestic garage and home gym/ commercial gym flooring.

Its unique blend of polymers make it UV and chemical resistant and yet allow it to be easy to cut and lay. On uneven floors it can even be bonded without any detrimental effect on the tile.

P&R Tile is fully recyclable. If you ever wish to change the tiles at any time we can regenerate your old tiles against new ones offering you savings on a new floor. Should you ever move you can simply lift it up and relay at your new premises. The possibilities of Ultima-SQ are significant as they enhance any flooring space with up to 10 colours to choose from.

Packed in boxes of 8 tiles (2sq mtrs). Larger orders can be palletised.

P&R Interlocking floor tile is manufactured under accreditations ISO 9001 and the automotive derived TSI6949.
