

Lynar Manufacturing has now successfully purchased the land and building in which we have resided in for many years. This not only brings further security to our future trading but also opens up endless possibilities with development plans and modernising the facility to compete with the ever advancing industry we find ourselves in today.

Steve Richens – Managing Director

“ Over a year of legal efforts to purchase the land and building, we are extremely happy and relieved to be able to publicly announce that this has now been completed as of the 15th July. Future development has always been a key driving force of our business and the result of this is; a secure premise in which to grow from and a collection of exciting projects that we have had in the pipeline for many years that can finally come to fruition! Everyone in the company is delighted with the news and we look forward to many more great years ahead of us. “
