

Midas - Specialists in Medical and Scientific Mouldings

Midas Pattern Company has many years' experience in the rapid manufacture of large, low-volume, high-quality polyurethane mouldings and prototypes for medical, bio-medical and laboratory instrumentation enclosures.

The company has extensive knowledge of the regulations relevant to this sector, has invested in the latest technology and understands and can meet the requisite material specifications. In addition, Midas paint finishes are not only of the highest quality but extremely durable and resilient to cleaning chemicals.

All Midas mouldings are supplied fully finished, painted, screen-printed and assembled ready for installation.

Midas offers two unique, easily modified tooling systems:

FASTrim™: a low-cost solution for producing even large prototypes, in production materials in as little as 10 – 15 days.

MRIM™: a high-quality composite tooling system offering low set-up costs for high-quality mouldings in volumes from 1 to 2000 per annum, with a guaranteed life of 5000 off.
