

Make Midas Part of Your Supply Chain at EDS 2016 – October 19th & 20th Stand D105

As part of our lead up to exhibiting at [Engineering Design Show](#) we would like to highlight key reasons to partner with [Midas Pattern Company Ltd.](#)

Midas is an award winning, specialist [RIM moulding](#) company, dedicated to offering a high level of Quality, Service and Design for Manufacture support. Using its 27 years' experience and advanced manufacturing facilities it can provide a range of prototype and production PU moulding solutions, ideally suited to the development of high value, innovative products. From [large scale prototypes](#), in production material, delivered in days, to low set-up costs for production parts fully painted and assembled in house - Midas can help bring your designs to life.

Over the past 27 years Midas has grown its business by supporting cutting edge start-up businesses right through to global medical and instrument device companies, primarily through its ability to offer quality parts, ***On Time, Every Time.*** Midas has continued to tailor its processes and capabilities to

become a key development supplier and provide on-going solutions, helping customers achieve their new product development goals.

Reasons to partner with Midas:

- Full 'Design For Manufacture' support throughout your development phase
- Prototyping in range of materials for large, complex parts, fascia's and instrument casings - fully finished, painted and accurate to CAD data
- Quality, validation support and full traceability on all mouldings
- A strong track record of taking components from development through to production and on-going delivery throughout the life of your product
- Low risk tooling investment with Midas' unique MRIM composite tooling
- Flexibility in part supply, small batch deliveries, stock holding and full turnkey solutions making Midas an ideal partner in your Supply Chain
- All processes completed in-house including painting, screen printing and assembly - take a look at our video for a snap shot of this process on our website now...
