

GET CONNECTED

NEW Universal Controller Launched

ORLIN Technology's range of SMAC actuators are ideal for automation thanks to their high speed, precision, soft-land technology for delicate parts and closed-loop positioning. However, as a stand alone product they have limited connectivity options. This, combined with the rising popularity of fieldbus systems, prompted ORLIN to develop a NEW Universal Controller.

Our new controller is available with:

- EtherCAT
- CANopen
- PROFIBUS
- Modbus
- also PROFINET is coming soon

The Universal Controller drives the whole range of SMAC single and multi-pole actuator models up to 5 amps. They will also drive brush or brushless servo motors and are available in a stepper motor version.

If you would like to find out more, receive a datasheet or arrange for a no-obligation demonstration of the Universal Controller, please get in touch! sales@orlin.co.uk or 01525 306100.

NEW RANGE Coming Soon

Here at ORLIN Technologies, we are really excited to tell you about a new range that we will be launching very soon. The range will include a selection of motors and drivers, including integrated servomotors. These will include several NEW fieldbus options.

Watch this space to be the first to find out more.

Refer a Customer - Receive a Reward!

We are always grateful when one of our existing customers recommends ORLIN Technologies to another potential customer. Word of mouth is our favourite way of finding new customers and it really is the biggest compliment that we can receive, when you are happy enough with our service that you will recommend others to use us.

We want to say thank you to you, too. If you think you have some new business for us, let us know and in return we will send you some wine in the post. It's a small thank-you, but hopefully one that will be well appreciated!
