

2018 WEBINAR SERIES

Our latest webinar is now available for you to view on-demand!

In our webinar, Richard Anthony - Senior Applications Engineer, joins with the Institute of Engineering Technology to take an in-depth look at designing complex part features for rapid injection moulding. We break down difficult challenges encountered when designing for complex part geometries and offer quick solutions to overcome them.

Our presentation covers:

- - Using clips, snap features, living hinges, and manual pick-outs
- - Designing with EDM (electrical discharge machining) in mind
- - Accomplishing long, thin cores and undrafted holes with staggered shutoffs
