

## WBPG Heavy Duty Lifting Capacity 85 - 250 Tonnes

### ***Ultimate Heavy Duty Lifting Application:***

RUD manufactures a range of lifting and lashing applications that guarantee ultimate safety when lifting and moving heavy loads. Offering over 500 different tested and certified lifting/lashing points for bolting and welding.

The impressive WBPG 85-200 Tonne hoist ring offers the ultimate solution for many heavy duty lifting requirements such as; offshore, construction, heavy engineering and handling.

The WBPG is loadable from any side in the direction of the pivot meaning it is suitable for lifting and turning of heavy loads. It has the ability to rotate 360° and swivel 180°. The WBPG comes with a detachable suspension ring in the shape of a shackle for the attachment of common lifting means.

Comprising an outstanding heavy duty design with a working load limit capacity of 85-250 tonnes it is no wonder the demand for the WBPG has been high across the heavy duty lifting sector. The WBPG is ball bearing mounted and can be bolted on plate; on a flat surface, a flange or on a cone.

Across the offshore industry the WBPG has been used to lift heavy cable-laid grommets; the WBPG offers a removable suspension ring in the shape of a shackle to attach the cable-laid grommets to for lifting.

As one of the world's largest manufacturers of lifting and lashing applications combined with their extensive range of products and knowledge in the market, RUD are continually innovating and developing their extensive product range to stay at the forefront of their customers' demands.

***RUD Chains Ltd: for all your Heavy Duty lifting needs***
