

If you are a manufacturer of components or assemblies incorporating plastics, metals, ceramics, electronic components or any combination of these, Laser Scanning, in partnership with Nikon Metrology, is now able to perform X-ray scanning and CT contract inspection services for new or existing clients.

We can support aerospace, automotive, Formula 1, telecoms, pharmaceutical industries and many more. Samples examined range from the latest hi-tech microchip to a 65 million-year-old dinosaur egg. The possibilities are endless!
