

# Railway Instruments

Standard or bespoke instruments

**Precision hand measuring and control instruments for the railway industry with custom solutions available.**

We can offer you metrology instruments for rail applications as standard products or work with you to create bespoke solutions to perfectly suit your requirements and standards.

To ensure superior quality and products which will last, each example is produced in house by our partner, meaning they have full control of the process from raw material to the final product.

**If you have any requirements please contact us for more information and we can see how we can help**
